## Quiet, Powerful, Compact -- Cool-stack III™ Cooling for Mid-Size Racks

*--Active Thermal Management introduces Quiet Cooling in a 1-U package--*

Rosebery, NSW, 14 January 2008 – Active Thermal Management, experts in quiet thermal protection solutions, today announced Cool-stack III™, a 1-unit high hot air exhaust system in Australia. With four (4) 120mm fans and an 18” depth, the Cool-stack III™ has the power - and the reach - to pull up to 70 CFM of hot air out of tightly-packed racks while generating very low noise levels. Heated air is normally exhausted through the perforated front panel, but exhaust fittings and tubing provided can move the hot air safely away if the rack is located in a closet or cabinet.

“Cool-stack III™ fits in nicely between the smaller Cool-stack I and the larger Cool-stack II, giving us a complete line of rack-mounted ventilating systems. It is a flexible solution for the mid-size rack and heat load” said Frank Federman, ATM President.

Cool-stack III is temperature-controlled, switching from a constant, very low “idle” speed, suitable for removing stand-by heat generated by components such as cable boxes and satellite receivers, to full speed as rack temperature changes. Internal movable jumpers can be set during installation to satisfy the requirements of a particular installation, whether residential or commercial.

Press Release- LTE releases ATM quiet Coolers in Australia

*Cool-stack III has a suggested retail price of \$699.00 available now by LeisureTech Electronics who has been appointed the Australian and NZ distributor.*

**About Active Thermal Management:**

Active Thermal Management, headquartered in Valencia, California, is a leading manufacturer of quiet, professional thermal protection products for residential and commercial installations. Providing highly specialized products for almost every conceivable installation and application, Active Thermal Management produces cooling solutions for large and small system enclosures as well as individual components. For more information, please visit [www.activethermal.com](http://www.activethermal.com)

**About LeisureTech Electronics**

Founded in 1977, LeisureTech Electronics' is a global OEM technology provider and manufacturer for the residential systems market, manufacturing Andrews Audio and A-BUS products. LTE founder Andrew Goldfinch teamed up with Len Andrews in 1989 and in 1997 the enterprising duo invented A-BUS, a revolutionary technology for multi-room audio which is an industry standard worldwide. In addition they import for Australian distribution TruAudio, Russound, Terra, Universal Remote Control, Channelvision and Active Thermal Management products to audio retailers, integrators and custom installers.
