

What's New

improve household communication ▲

Russound's new ComPoint intercom communications system can be used as a stand-alone system or as part of a complete home automation setup. Using any ComPoint keypad, users can greet visitors or communicate from room to room from anywhere in the home. The optional *door strike release* module enables users to control who is allowed access to the home. Features include the *do not disturb* mode that blocks intercom messages coming through to a room; multi-room audio; and individual rooms can be set to *listen* mode, enabling easy monitoring of intercom chat throughout the home. The ComPoint system includes Russound's ISK1 or ISK2 keypads and an ISH1 Hub and can be connected in up to 36 rooms.

▼ steady up

The Australian-designed Laddermate ladder stabiliser is designed to help prevent falls from slipping ladders.

The product, which is made from aluminium sections and weighs only 2.6kg, features a support bar that increases the effective width of any ladder to more than 800mm at roof level. Extra safety is provided by large rubber stop grips at both ends of the support bar which eliminate slippage on roofing, guttering, fascia or overhangs on buildings and structures undergoing construction or maintenance.

Laddermate's large stand-off brackets also help prevent damage to gutters, roofing, cladding and fascias, and provide a strong and secure position for exit and entry onto the roof.
