Multi-Room Audio Doesn't Need Multi-Trips

Once again we've broken the mold of cutting-edge speaker technology and innovation. TruAudio specializes in architectural speakers. We constantly go to great lengths to ensure that our speakers blend into any room's décor while still delivering unforgettable, life-like sound. The Ghost series pushes this concept to an all new level. A uniquely designed speaker housing hides the entire frame once the grill is installed. With this new design, the speaker blends seamlessly into the room's environment and is a labor saver.

Each in-wall Ghost speaker come with a straight and 25° angled tweeter Wave Guide. The Wave Guide will improve your sound stage in any installation. TruAudio is known for amazing sound and ease of installation; now with the all white frameless speaker and the Wave Guide you can create the perfect installation.
Wave Guide - Another TruAudio Innovation!
